

Introducing the New ...

# MAINE METHAMPHETAMINE COMMUNITY RESPONSE TOOLKIT

Coming soon!

**The Maine Methamphetamine Prevention Project/Maine Association of Prevention Programs is developing a Methamphetamine Community Response Toolkit. This book will be available December 2007.**

**The Maine Methamphetamine Community Response Toolkit will be a comprehensive approach to addressing methamphetamine abuse, with a specific focus on empowering local communities.** Because meth affects all of us, the Resource Guide provides community coalitions, business leaders, faith-based organizations, parent groups, schools, law enforcement, health care professionals, civic groups and other community leaders with proven and effective prevention practices. This guide offers techniques for neighborhood involvement and community action, helps families identify signs and symptoms of meth use, and offers links to methamphetamine treatment resources. It is, in short, one-stop shopping for those involved in the fight against meth, and can make all the difference as you mobilize your community and take action.

**The Maine Methamphetamine Community Response Toolkit will have resources for both community education and taking action!** It will be a Community Action Guide with over 20 different sections on how to mobilize your community to fight back against meth. Also included will be a master Methamphetamine PowerPoint slide library with slides and talking points. These slides include the effects of meth, meth statistics, photos of meth, meth detection, identification of meth labs, meth laws, the dangers of meth and many more important topics.
